EXECUTIVE SUMMARY

The major findings of the 2004 SIAST Graduate Employment Survey are listed below. For comparison, the 2002 figures are included in brackets. The results below identify SIAST-wide figures. Divisional and core and extension program breakdowns are identified in the Overview of Results section and the results on program data are located in the program pages at the end of the report.

- Graduates that received credentials in the time period July 2003 – October 2004 were surveyed.
- Where possible, for comparison, figures from the last survey, conducted in 2002, are included in brackets.
- The results below identify the SIAST-wide figures. Divisional breakdowns are identified in the Overview of the Results section.
- Results for specific programs are identified in the Programs section of the report.
- **4,194** (3,890) **graduates were surveyed**, 2,720 from core programs, and 1,474 from extension programs.
- The 4,194 graduates received credentials from **155 programs**.
- Of the 4,194 surveyed graduates, 2,071 (2,461) responded, for an overall **response rate of 49.4%** (63%).
- The response rate of 49% allows for an excellent overall **margin of error of ± 1.5%** (± 1.2%) for the responses of **all SIAST graduates**, with a 95% confidence level (see Methodology section for explanation of margin of error).
- 1,418 of the respondents were graduates from core programs, for a response rate of 52% (64%), while the remaining 653 respondents were from extension programs, for a response rate of 44% (62%).
- The margin of error for all **core program** results is **± 1.8%** (± 1.5%), and **± 2.9%** (± 2.0%) for all extension program results.
- **61%** of respondents reported **seeking employment in this field** as the primary reason for completing their programs.
- **91%** (92%) of responding **graduates who were available to work** were **employed (employment rate)**.
- **64%** (76%) of available to work respondents were employed in **full-time** occupations and **50%** (64%) of the available for work respondents were employed in **full-time training-related** occupations.
- **79%** (83%) of employed graduates responding were **in training-related occupations** and **55%** (70%) of them indicated they were in full-time training-related occupations.
- **29%** (16%) of employed respondents were **working part-time or casually**, and of these, **42%** (50%) reported that the part-time work was **by choice**.
- **7%** (5%) of employed respondents indicated that they were **self-employed**.
- The **average salary** for respondents in **full-time training-related** employment was **$2,491** ($2,276) per month.
- **92%** (94%) of employed respondents were **working in Saskatchewan**. **44%** (45%) of this figure were working either **in Regina or Saskatoon**.

- **8%** (6%) indicated they were **working outside Saskatchewan,** and of that figure, **68%** reported that this was **by choice**. Of the 8% (6%) that reported working outside Saskatchewan, **44%** indicated **personal reasons** as the primary reason for leaving the province.

- Of those respondents who reported they were not working at the time of the survey, **60%** (64%) of them indicated that they **had worked** at some time since graduation, and **49%** (44%) reported that they were scheduled to return to work in the future.

- **59%** (72%) of graduates that had worked but were not employed at the time of the survey indicated that the work had been directly related to the education and training they received in their programs.

- **46%** (52%) of graduates, who were not employed, indicated they were **not looking** for work, primarily because they were enrolled in further education.

- The primary reason the unemployed respondents were not currently employed was that they were **enrolled in further training (18%).** And of this figure, **45%** (41%) indicated that they were **enrolled in a SIAST program –** either the same SIAST program (different credential) or a different program altogether.

- **67%** of those in further education or training indicated they were employed.

- **97%** (97%) of all respondents **rated the overall program quality at SIAST as good to excellent**.

- **77%** (81%) of all employed respondents indicated their training program had **prepared them well or very well for a training-related job**.

- The **average age** of all respondents was **29** (29) years. The average age level was lower in the core programs, at 28 years of age, and much higher in the extension programs at 32 years of age.

- **57%** (60%) of respondents were **female**, **43%** (40%) were **male**.

- **16%** (13%) of respondents identified themselves as being of **Aboriginal** origin. The Aboriginal respondents identified themselves as 36% Status/Treaty Indian, 59% as Metis, and less than 6% as Non-Status Indian.

- **6%** (4%) said they were **persons with disabilities** and **7%** (2%) identified themselves as members of a **visible minority**.

Introduction

1.0 Introduction

The SIAST Graduate Employment Report is produced from data collected in the SIAST graduate employment survey. As of 2002, the graduate employment survey is being conducted every two years (bi-annually). The survey collects data from a variety of questions relating to the employment status, evaluation of training, and general demographic characteristics of SIAST's graduates.

SIAST is committed to increasing the success of individuals in programs and services. Graduate feedback from the survey provides valuable information about the success of SIAST graduates in the labour market and the quality of training. A wide range of stakeholders, ranging from SIAST management, government, high school students and career counselors, labour analysts, and policy administrators, use the Graduate Employment Report as a reference document in program and labour market review and planning.

1.1 Scope

The 2004 SIAST graduate employment survey collected data from those 4,194 graduates who completed a SIAST program of study and graduated between July 2003 and October 2004.

In the 2003-2004 academic year, SIAST had graduates from a total of 155 credentialed programs. SIAST core programs are defined as SIAST programs funded by the core budget and are typically offered at one or more of the campus locations: Kelsey (Saskatoon), Palliser (Moose Jaw), Wascana (Regina) and Woodland (Prince Albert).

Many SIAST programs are also offered off-campus throughout the province, and these are considered "extension programs". SIAST extension programs are generally cost-recovery and are offered throughout the province in a variety of delivery formats: with partners, via distance education learning and in industry-based training formats.

All programs at SIAST are clustered and reported by one of the following six program divisions:

Business and Agriculture	Community Services
Industrial Training	Nursing
Science and Health	Technology

One of the following four credentials is awarded for each SIAST program: applied certificate, certificate, advanced certificate, and diploma. In some instances a program may have both a certificate and diploma level credential.

In order to have programs that are current, SIAST continually reviews the program mix. Some programs may have recently been deleted but graduates were permitted to complete their programs and graduate. Some programs have been re-titled or re-credentialed. Appendix A lists changes to the programs offered.

1.2 Methodology

Data Collection and Analysis

In order to obtain a sufficient sample to assess the success of graduates by program, a census of SIAST graduates is undertaken for the graduate employment survey. The graduate contact list, including telephone numbers and mailing addresses, is provided by Registration Services at SIAST. All SIAST graduates, as defined in the list provided by the Registration Services office, were surveyed.

In the 2004 graduate employment survey, 4,194 graduates, who completed their programs between July 2003 and October 2004 were surveyed. The respondents represented graduates from 155 programs (in addition to 22 programs that were offered but did not have graduates within the July 2003 to October 2004 period).

The data collection process consisted of two phases, which occurred between November 2004 and February 2005. The first was a mail out of a self-administered paper survey to all 4,194 graduates. In November/December 2004, each graduate received the questionnaire to complete, along with a letter explaining the purpose of the study. Those graduates, who did not respond to the mail-out questionnaires by January, 2005 were subsequently contacted by telephone in February/March of 2005 and asked to answer the questionnaire one-on-one with an interviewer. Norsask Consumer Interviewing Services Ltd. (Norsask) of Saskatoon conducted the telephone interviews. Every effort was made to contact the graduates in order to provide the highest possible response rate.

Responses to the survey by mail were input by SIAST Planning, Research and Development personnel into a statistical package for social sciences (SPSS) database. Respondent data collected by Norsask personnel were recorded using CATI (computer assisted telephone interview) technology. The mail-in responses and telephone results were merged. SIAST Institutional Research and Analysis staff checked the data for input accuracy, consistency, and then analyzed the total results using the SPSS statistical package.

1.3 Response

A total of 2,071 graduates participated in the 2004 graduate employment survey, with an overall response rate of 49.4 percent. While lower than the previous year's participation (63 percent in 2002), this response rate still allows for an excellent overall margin of error of ± 1.5 percent for all SIAST graduates, with a 95 percent confidence level. This is comparable to 2002, which achieved an overall margin of error of ± 1.2 percent. Similarly, the margin of error for all core programs is ± 1.8 percent, compared to ± 1.5 percent in 2002 and ± 2.9 percent for extension programs, versus ± 2 percent in the previous survey. The margin of error increases for each sub-population. Table 1 provides the response rates and margin of error for SIAST overall, by division, and by core/extension.

The margin of error indicates the range within which the true results would be if everyone in the population had responded to the survey. The larger the margin of error, the less confidence one has that the survey's reported percentages are close to the "true" percentages; i.e., the percentages in the whole population. The margin of error is calculated directly from the sample size (the number of respondents) and is commonly reported at a 95 percent level of confidence.

The confidence level is the level of certainty to which a true value will be included within the range specified by the margin of error (confidence interval). A 95 percent confidence level means that the sample responses will provide an accurate representation of the results of the total population, 19 times out of 20, within the margin of error calculated. Generally, researchers try to obtain a sample size that will allow them to achieve a margin of error of at least 5 percent.

Given a ± 1.5 percent margin of error overall, this means that if 91 percent of respondents indicated they were employed, then we can be 95 percent confident that 89.5 percent to 92.5 percent of all SIAST 2004 graduates would be similarly employed.

Table 1: Survey Response Rate and Statistical Significance, by Division, by Core/Extension, 2004

2004	Graduates	Respondents	Response Rate	Margin of Error
SIAST Overall Programs by Division				
Business and Agriculture	677	339	50%	3.8 %
Community Services	703	348	50%	3.7 %
Industrial Training	887	325	37%	4.3 %
Nursing	277	164	59%	4.9 %
Science and Health	1030	594	58%	2.6 %
Technology	620	301	49%	4.1 %
Total SIAST Programs	**4194**	**2071**	**49%**	**1.5 %**
SIAST Core Programs by Division				
Business and Agriculture	437	223	51%	4.6 %
Community Services	519	259	50%	4.3 %
Industrial Training	476	220	46%	4.8 %
Nursing	192	117	61%	5.7 %
Science and Health	610	355	58%	3.4 %
Technology	486	244	50%	4.4 %
Total SIAST Core Programs	**2720**	**1418**	**52%**	**1.8 %**
SIAST Extension Programs by Division				
Business and Agriculture	240	116	48%	6.6 %
Community Services	184	89	48%	7.5 %
Industrial Training	411	105	26%	8.3 %
Nursing	85	47	55%	9.6 %
Science and Health	420	239	57%	4.2 %
Technology	134	57	43%	9.9 %
Total SIAST Extension Programs	**1474**	**653**	**44%**	**2.9 %**

For populations with less than 30 members, as is the case with several SIAST programs, it is recommended that all members be surveyed, in order to obtain reliable information. At the program level, the results will provide a good indication of graduate success and training quality, but may not be representative of all graduates from that program if the population is less than 30 graduates, and only a small portion of graduates responded. SIAST made every effort to contact all graduates and encourage them to participate. In some instances, however, certain programs do not have a large number of respondents. The reader is cautioned to take this into consideration when viewing the program pages at the end of the report.

1.4 Reporting of Results

The findings of the analysis are presented in the Overview of Results. The Overview of Results summarizes the survey results in text, tables and graphs format. The areas examined in this section include employment status, continuing education, program assessment and general graduate demographics.

The results of the study for each question are provided by SIAST overall, as well as by core (on-campus) and extension (off-campus - number of locations throughout the province), and the six SIAST program divisions.

Employment information is presented as a percentage of those graduates available to work. According to Statistics Canada, the available to work is defined as the labour force and includes those that are currently employed, as well as those not currently employed but who are seeking employment.

The percentage results throughout the report have been rounded to the nearest whole percentage and therefore in some cases the total percentages may vary slightly from 100%.

In presenting the results, the total number of graduates responding to each question will vary because: a) respondents did not always provide an answer to each question; and/or b) some questions were not relevant to all respondents. For example, some questions were asked only of those who were currently employed at the

time of the survey, and conversely, other questions were asked only of those who were not currently employed at the time of the survey.

The Appendices section at the back of the report contains a listing of programs that have recently been revised, either re-titled, identified with different credentials, or deleted (appendix A); a copy of the survey questionnaire (appendix B); a question-by-question response count (appendix C); and general SIAST information (appendix D).

The SIAST Graduate Employment Report 2004 was compiled from the results of the analyses and prepared for Internet distribution and limited hard copy printing.

Overview of Results

2.0 Employment

Graduates were asked to respond to a number of questions regarding their ability to secure employment after graduation, as well as the details of that employment, such as status (full or part-time), location, number of jobs held, and relation to training.

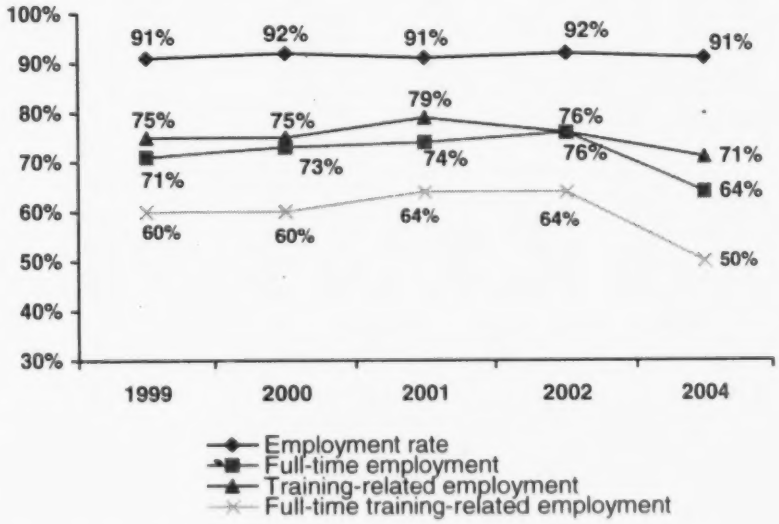
2.1 Employment Rates

2.1.1 Employment Rates for SIAST Overall

The following employment rates are calculated based on those respondents who are available to work. The respondents who are included in the available to work category are those graduates who were employed at the time of the survey and those who were not employed but were looking for work (Statistics Canada's definition of the Labour Force).

In the 2004 GER Survey, the overall employment rate for all respondents was 91 percent. Graph 1 illustrates that the employment rate has remained relatively constant, fluctuating by one percent over the past five years that the survey has been conducted. In contrast, full-time and training-related employment rates have experienced a notable decline in 2004.

Graph 1: Employment Trends for SIAST Graduates, Based on Available Workforce, 1999-2004



The 2004 GES results indicate that it is becoming more difficult for graduates to find employment that is both full-time and training-related.

The level of full-time employment reported by SIAST graduates surveyed dropped to 64 percent, in 2004. The proportion of respondents who were able to obtain training-related employment at the time of the survey has decreased to 71 percent, from a high to 79 percent in 2001.

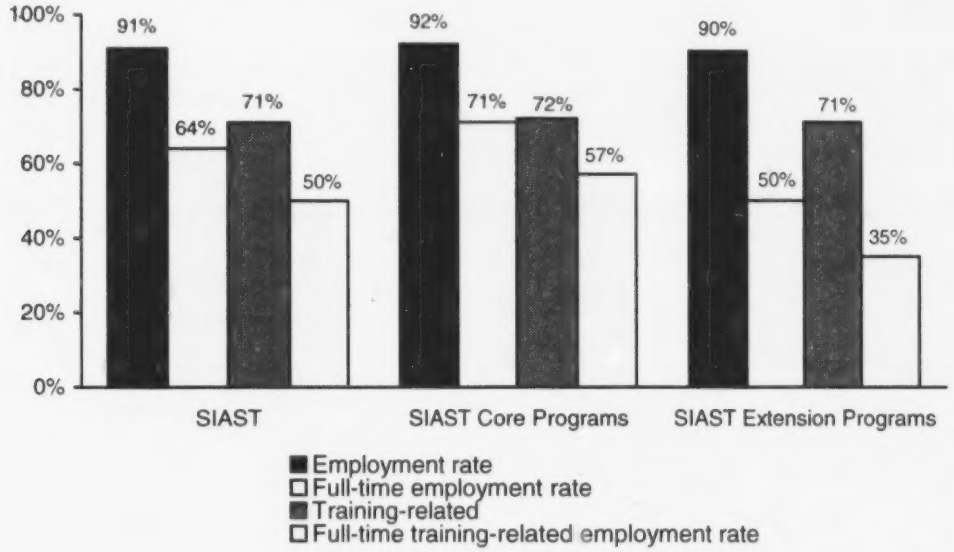
The proportion of respondents who were able to find full-time employment in a training-related field has declined to 50 percent, from a relatively stable 64 percent in 2001 and 2002.

2.1.2 Employment Rates for Core and Extension Programs Overall

Graph 2 compares the employment rates for core and extension programs in 2004, with that of SIAST overall. On the whole, the employment rates for core programming were higher than the SIAST averages, with a 92 percent employment rate, a 71 percent full-time employment rate, a 72 percent training-related employment rate, and a 57 percent full-time training-related employment rate.

The overall employment rate (90 percent) and training-related employment rate (71 percent) for extension programming was similar to the SIAST averages; while full-time employment and full-time training-related employment rates were notably lower, at 50 percent and 35 percent respectively.

Graph 2: Employment Rates, by Core/Extension, Based on Available Workforce, 2004



2.1.3 Employment Rates by Division Overall (Core and Extension Combined)

Graph 3 provides a breakdown of employment rates by division.

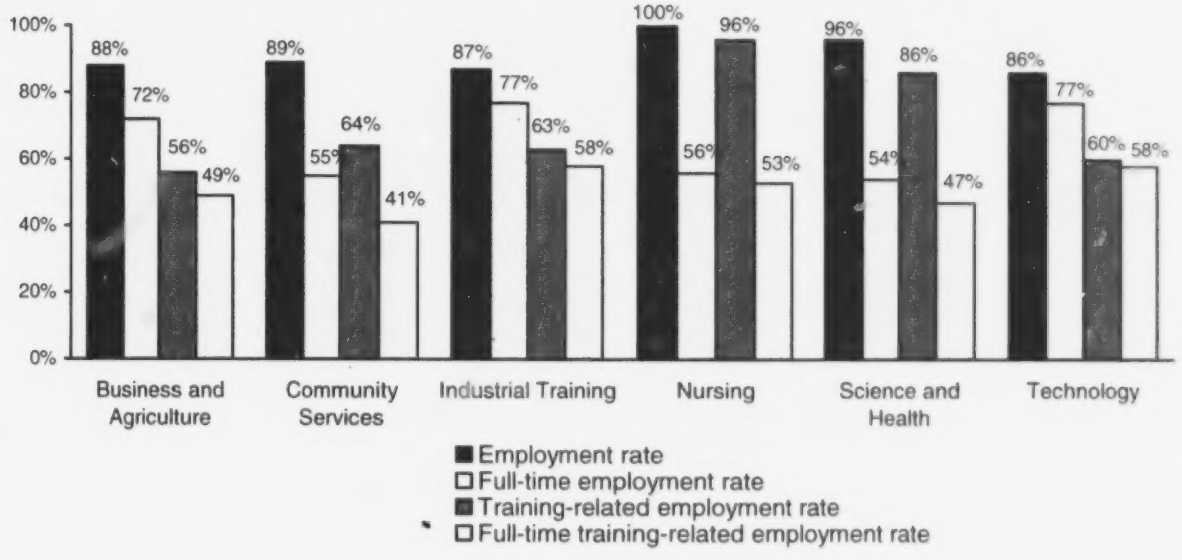
The higher employment rates in the nursing (100 percent) and science and health (96 percent) divisions pull up the overall SIAST rate to 91 percent, as the remaining divisions have employment rates in the high eighties.

Similarly, the nursing and science and health divisions pulled the overall SIAST training-related employment rate to 71 percent, with rates of 96 percent and 86 percent, respectively. The business and agriculture division had the smallest proportion of students in training-related employment, at 56 percent.

Respondents in the business and agriculture (72 percent), industrial training (77 percent), and technology (77 percent) divisions reported a higher proportion of full-time employment than the SIAST average of 64 percent.

The industrial training (58 percent) and technology (58 percent) divisions had the highest proportion of respondents who were able to find full-time training-related employment; while community services respondents (41 percent) had the lowest probability of obtaining similar employment conditions.

Graph 3: Employment Rates, by Division, Based on Available Workforce, 2004



2.1.4 Employment Rates by Division (Core and Extension Reported Separately)

Table 2 provides a further breakdown of employment rates by division for core and extension programming. At this level, employment rates ranged from 74 percent to 100 percent. For the most part, respondents from SIAST's core programs by division reported higher employment rates than those in extension, with the exception of the community services division.

Respondents from the industrial training division core programming (68 percent) were most likely to find full-time training-related employment, followed by those in science and health core (63 percent) and technology core (60 percent).

Respondents from the science and health division extension programming (23 percent), the industrial training extension programming (35 percent), and the community services division core programming (39 percent) had the most difficult time finding full-time training-related employment.

However, looking at extension programming only, the community services division had the highest proportion of respondents that reported full-time training-related employment.

Table 2: Employment Rates, by Division, by Core/Extension, Based on Available Workforce, 2004

	Available for work	Employment rate	Full-time employment rate	Training-related employment rate	Full-time training-related employment rate
SIAST Core Programs by Division					
Business and Agriculture	207	89%	75%	57%	52%
Community Services	216	88%	53%	62%	39%
Industrial Training	211	93%	85%	72%	68%
Nursing	114	100%	61%	95%	57%
Science and Health	338	95%	71%	84%	63%
Technology	225	87%	78%	64%	60%
Total SIAST Core Programs	1311	92%	71%	72%	57%
SIAST Extension Programs by Division					
Business and Agriculture	104	88%	67%	54%	42%

OVERALL SIAST TOTAL	1923	91%	64%	71%	50%

2.1.5 Employment Rates for Aboriginal Respondents

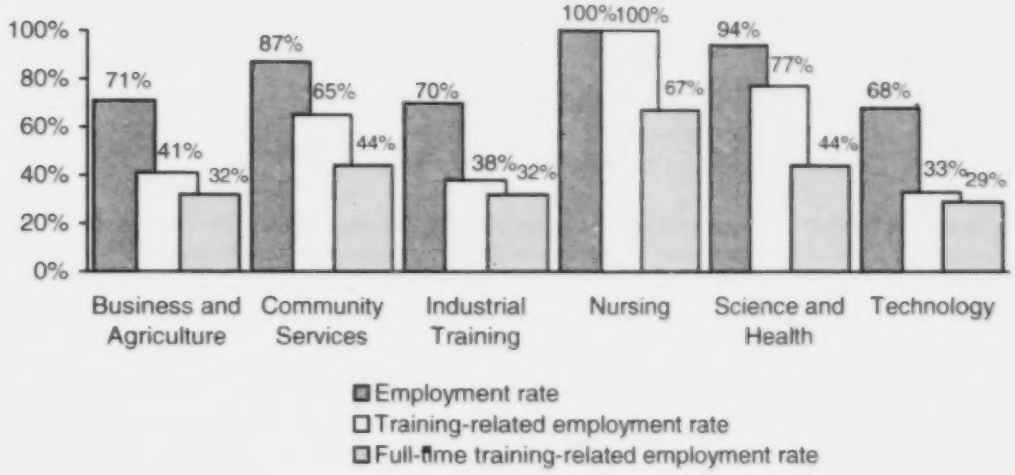
The employment rate for Aboriginal respondents in the survey was 81 percent overall, slightly less than for all SIAST respondents (91 percent). Similarly, the Aboriginal full-time employment rate of 55 percent and full-time training-related employment rate of 40 percent were lower than for all SIAST respondents (64 percent and 50 percent, respectively).

Both the nursing division (at 100 percent for both the employment rate and the training-related employment rate) and the science and health division (at 94 percent and 77 percent respectively) showed encouraging results for the Aboriginal respondents in these divisions. The employment rates by division for those available to work were:

- Business and Agriculture 71%
- Community Services 87%
- Industrial Training 70%
- Nursing 100%
- Science and Health 94%
- Technology 68%

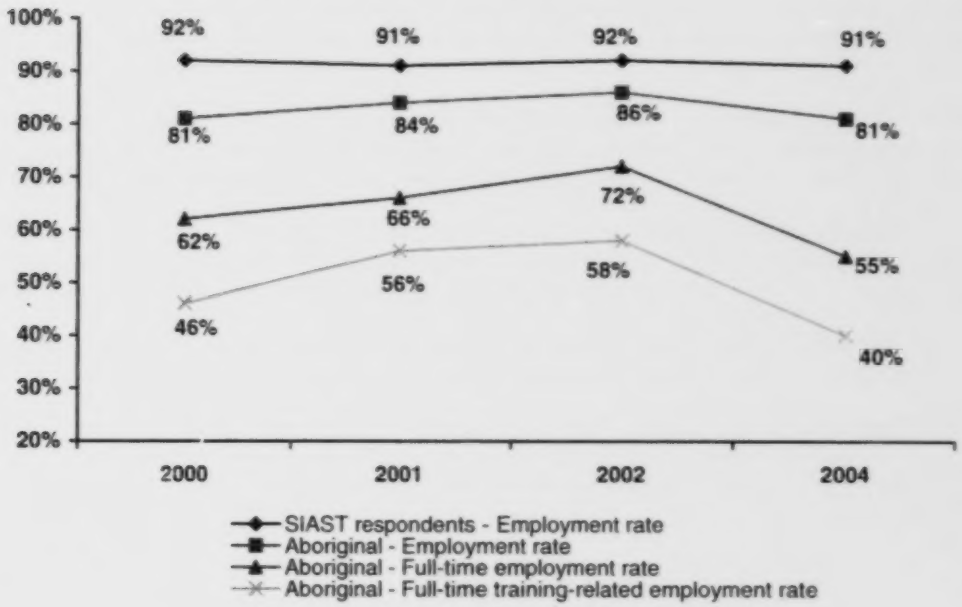
Graph 4 indicates the employment rates, training-related employment rates, and full-time training-related employment rates by division for Aboriginal respondents.

Graph 4: Employment Rates for Aboriginal Respondents, by Division, Based on Available Workforce, 2004



Employment rates in 2004 for Aboriginal respondents have decreased from 2002 and were more consistent with those rates in the 2000 survey. Similarly, the employment rates for all respondents to the survey have decreased from the rates in 2002. The survey was not conducted in 2003, therefore no data is available for that year. Graph 5 provides a four-year trend of employment rates for the Aboriginal respondents.

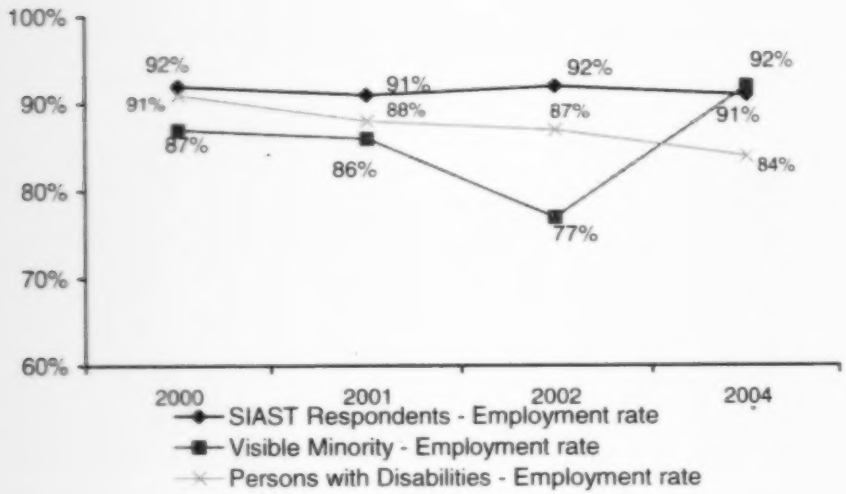
Graph 5: Employment Trends for Aboriginal Respondents, Based on Available Workforce, 2000-2004



2.1.6 Employment Trends for Persons with Disabilities and the Visible Minority Respondents

The employment rate for persons with disabilities and visible minority respondents was 84 percent and 92 percent respectively. The visible minority employment rate in 2004 was slightly higher than the SIAST overall rate of 91 percent. As Graph 6 depicts, the percentages for the four-year trend for both the persons with disabilities and the visible minority are fairly consistent, except for a drop in the visible minority employment rate in 2002.

Graph 6: Employment Trends for Persons with Disabilities and Visible Minority Respondents, Based on Available Workforce, 2000-2004



Note: Two types of ratios have been included in the Graduate Employment Report for questions pertaining to employment status and training-related employment. The above employment rates (Sections 2.1 through 2.6) have been standardized using the available workforce as the divisor. They do not represent the actual percentage of graduates who responded to the respective employment questions in the survey.

For example, 1743 graduates responded to the question regarding employment status (full-time versus part-time). Of these, 1239 graduates indicated they are employed full-time. In calculating the full-time employment rate listed in the sections above, the 1239 responses are divided by the available workforce total -1923 (comprised of 1749 respondents employed and 174 respondent actively seeking employment), for a full-time employment rate of 64 percent.

In all remaining sections of the report, the employment-related percentages have been calculated based upon the total number of graduates who responded to each question. For example, in reporting employment status (Section 2.9), the frequency for those graduates with a full-time status (71 percent), was calculated by dividing the 1239 graduates who indicated they are employed full-time by the 1743 graduates who responded to the question.

2.2 Training-Related Employment

Are you employed in a job directly related to the education and training you received in your program at SIAST? (Question 21)

If yes, is this training-related job your primary job? (Question 22)

The majority of respondents obtained employment which was directly related to their training; seventy-nine (79) percent of all employed SIAST respondents were working at training-related jobs at the time of the survey (Graph 7). Respondents from the nursing (96 percent) and science and health (90 percent) divisions had the most success in obtaining training-related employment.

Graph 7: Training-Related Employment, by Division, 2004

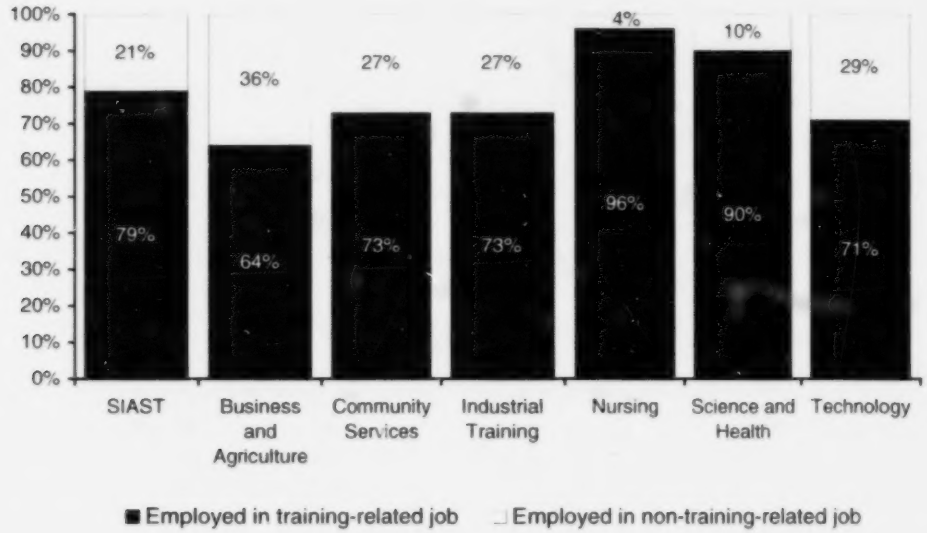


Table 3 provides a breakdown of training-related employment by core and extension programming for each division. As mentioned previously, the nursing and science and health divisions had the largest proportion of graduates with training-related employment. Graduates from extension programs in these divisions did slightly better than their peers from core programs. Many of the programs in both core and extension, particularly in the science and health division, are industry-based offerings, with respondents working in specific areas while studying - an example program is the Home Care/Special Care Aide. This fact may account for the high training-related rates in that division. Similarly, in nursing, respondents must have completed their training-related program prior to working in the health field.

Table 3: Training-Related Employment, by Division, by Core/Extension, 2004

	%	Employed in training-related job
SIAST Core Programs by Division		
Business and Agriculture	183	65%
Community Services	190	70%
Industrial Training	194	78%
Nursing	114	95%
Science and Health	320	88%
Technology	195	74%
Total SIAST Core Programs	1196	78%
SIAST Extension Programs by Division

Nursing	47	100%
Science and Health	223	92%
Technology	43	56%
Total SIAST Extension Programs	547	79%
OVERALL SIAST TOTAL	**1743**	**79%**

2.3 Employment Status

2.3.1 Full or Part-time/Casual Employment

Graduates were surveyed to determine the type of primary employment they had secured. The formula, developed by Statistics Canada, defines the hours for full- and part-time work. In the 2004 survey, graduates were also asked to identify if their employment was of a casual nature.

What is the employment status of your primary job: (Question 14)
a) 30 hours per week or more (Full-time),
b) less than 30 hours per week (Part-time) or Casual?

Full-time employment is defined as working 30 hours or more per week and part-time and casual employment are defined as working less than 30 hours per week. Overall, 71 percent of all SIAST respondents surveyed were working full-time in their primary job; while 29 percent of respondents had a primary job that was part-time or casual. The proportion of graduates who reported part-time and casual employment in their primary jobs has risen 13 percent since 2002.

The industrial training and technology divisions had the largest proportions of graduates with full-time employment in their primary job. Although graduates in the nursing and science and health divisions had the largest proportion of graduates with training-related employment, they were the least likely to have full-time employment. Community services also had relatively fewer graduates in full-time employment (Graph 8).

Graph 8: Full or Part-time Employment in Primary Job, by Division, 2004

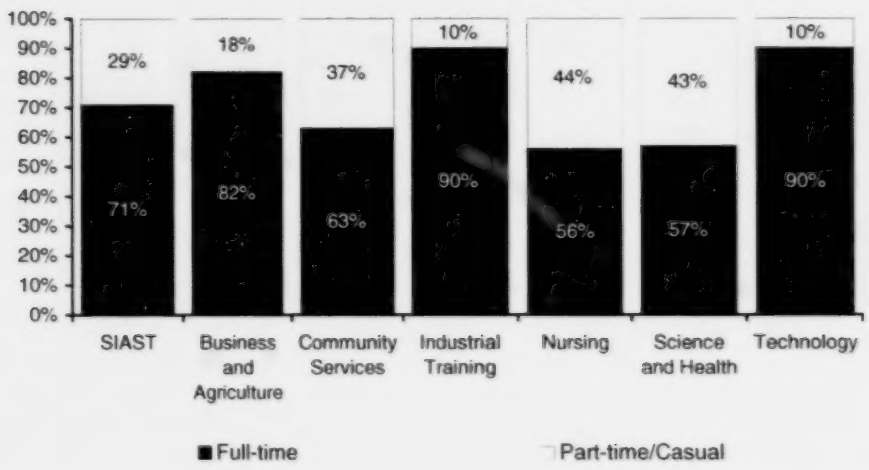

Table 4 provides the breakdown of employment status by core and extension programming for each division. In general, respondents from extension programs were less likely to be employed full-time, with a 56 percent full-time employment rate overall. Over three-quarters of graduates in core programs (78 percent) were employed on a full-time basis.

Table 4: Full or Part-time Employment in Primary Job, by Division, by Core/Extension, 2004

	#	Full-time	Part-time/ Casual
SIAST Core Programs by Division			
Business and Agriculture	183	85%	15%
Community Services	189	60%	40%
Industrial Training	193	93%	7%
Nursing	114	61%	39%

Technology	43	86%	14%
Total SIAST Extension Programs	548	56%	45%
OVERALL SIAST TOTAL	**1743**	**71%**	**29%**

2.3.2 Part-time/Casual Position – by Choice

If your primary job is a part-time or casual position, is this by choice? (Question 15)

It is assumed that those working in part-time or casual jobs do so because they can not secure full-time employment. This particular question had been added to the GES surveys in 2002 and again in 2004 in order to clarify if graduates wanted to work in part-time or casual positions. In 2004, the percentage of respondents who indicated they chose to work part-time/casual was less than those of the last study. Overall, 42 percent of respondents were working part-time or casual by choice, compared to 50 percent in 2002.

Overall, the industrial training (63 percent) and nursing (54 percent) divisions had the highest proportions of respondents who were working part-time by choice. Technology division graduates were the least likely to work part-time by choice (24 percent overall). Thirty-nine percent of employed community services and science and health graduates were employed part-time by choice, as were 44 percent of business and agriculture division graduates.

Table 5 provides a breakdown of part-time employment by choice for core and extension programming by division. In core programming, industrial training respondents were most likely to be employed part-time by choice, whereas the business and agriculture division had the highest proportion in the extension programs.

Table 5: Part-Time or Casual by Choice, by Division, by Core/Extension, 2004

	#	Part-time/ Casual by choice
SIAST Core Programs by Division		
Business and Agriculture	28	32%
Community Services	75	37%

Nursing	44	64%
Science and Health	81	36%
Technology	19	32%
Total SIAST Core Programs	260	42%
SIAST Extension Programs by Division		
Business and Agriculture	20	60%
Community Services	23	44%
Industrial Training	14	57%
Nursing	27	37%
Science and Health	151	41%
Technology	6	0%
Total SIAST Extension Programs	241	42%
OVERALL SIAST TOTAL	501	42%

2.3.3 Self-Employed

Are you Self-Employed? (Question 12)

The percentage of respondents indicating that they were self-employed remains fairly low. Overall, only 7 percent of all the respondents indicated their desire for entrepreneurship, a 2 percent increase from the 2002 survey, with the greater interest coming from science and health respondents in core programs (8 percent) and 12 percent business and agriculture respondents in extension programs (Table 6).

Table 6: Self-Employment, by Division, by Core/ Extension, 2004

	#	Self-employed

Nursing	47	4%
Science and Health	222	9%
Technology	43	0%
Total SIAST Extension Programs	547	8%
OVERALL SIAST TOTAL	1744	7%

2.3.4 Number of Jobs

How many jobs do you currently have? (Question 11)

Census 2001 results from Statistics Canada indicated that many in today's labour force had multiple jobs and that this trend would continue. Results of the survey confirm this fact. The average number of jobs that respondents from extension programs in both nursing and science and health programs had was two. The maximum number of jobs held by some respondents in core programs was 5 - three divisions with this figure. The maximum number overall in the extension programs was slightly less than 4, and again the nursing and science and health programs had respondents with multiple jobs (Table 7). It has been documented that many in the health care field are employed on a part-time basis.

Table 7: Number of Current Jobs Held, by Division, by Core/Extension, 2004

	#	Average	Maximum
SIAST Core Programs by Division			
Business and Agriculture	184	1	4
Community Services	190	1	5
Industrial Training	196	1	3

Total SIAST Extension Programs	549	1	4
OVERALL SIAST TOTAL	1749	1	5

3.0 Salaries

Employed graduates were asked to indicate the salary they earned. Some gave an hourly rate and others a monthly salary. All identified salaries were calculated to a monthly rate.

3.1 Salaries for SIAST Respondents

What is the hourly salary of your primary job before deductions? (Question 16)

The average (mean) monthly full-time training-related salaries for all respondents were $2,491, an increase from two years ago.

The minimum wage in Saskatchewan, since November 2002, has been $6.65 per hour. Based on a 37.50 hour work week, the minimum monthly salary for a full-time employee is $997.50 [6.65 X37.50 X4]. The majority of SIAST employed respondents were paid at a higher level than this rate (Table 8).

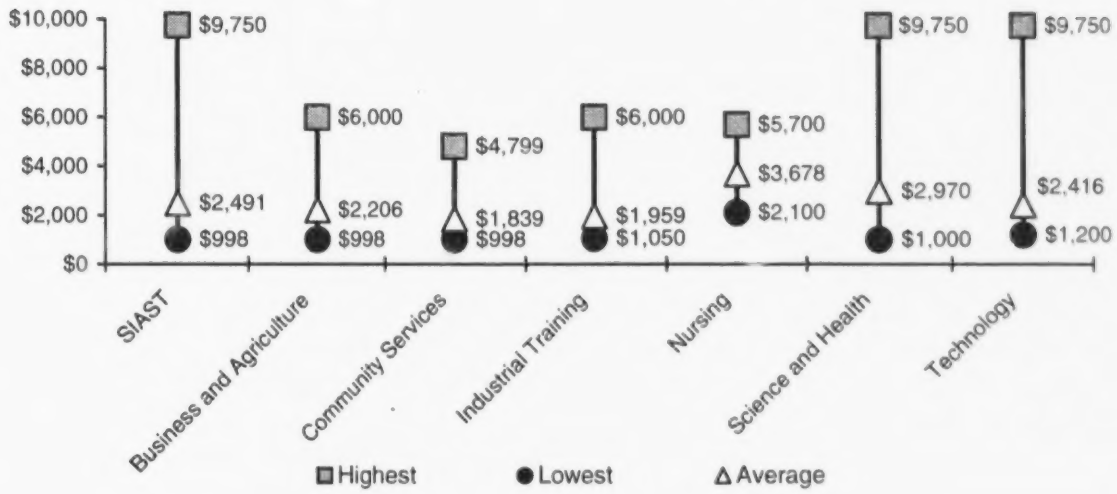
Two respondents, one in each of the science and health and technology divisions, recorded the highest monthly salaries, for training-related employment at $9750. In past graduate surveys, the respondents from the technology division working in the oil fields have reported very high salary levels.

Table 8: Monthly Salary of Full-Time Training-Related Job, by Core/Extension, 2004

	#	Highest	Average	Median	Lowest
Total SIAST Core Programs	724	$9,750	$2,567	$2,250	$998
Total SIAST Extension Programs	204	$6,000	$2,220	$2,138	$998
OVERALL SIAST TOTAL	928	$9,750	$2,491	$2,250	$998

As mentioned above, the highest salary, $9,750, was reported by two respondents in the core programming, one in the science and health division and one in the technology division. Two respondents in the extension programs recorded a maximum salary of $6,000 monthly, one in the business and agriculture division and the other in the industrial training division. Respondents in the business and agriculture division and the community services division reported the lowest salary of $998, which is the minimum hourly rate calculated to a monthly salary level (Graph 9).

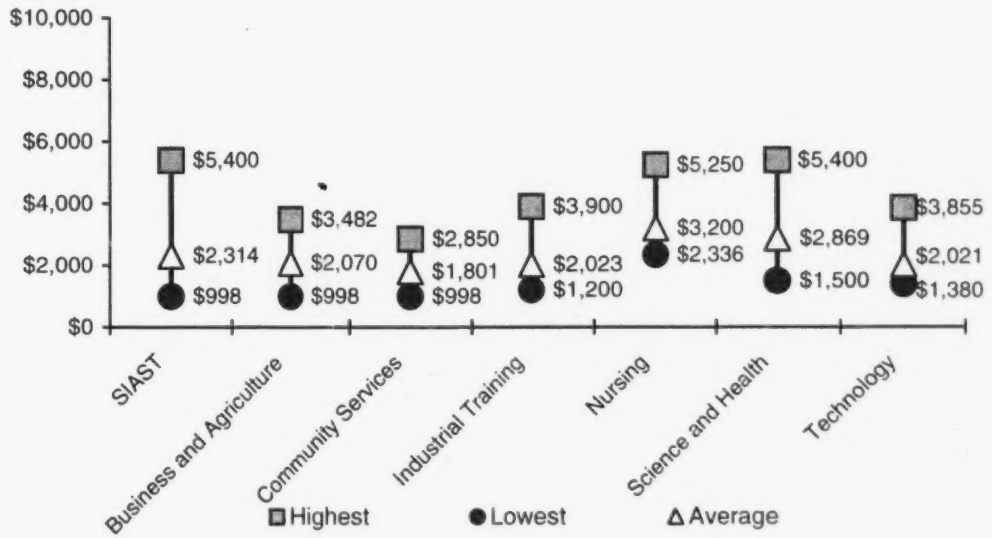
Graph 9: Monthly Salary of Full-Time Training-Related Job, by Division, 2004



3.2 Salaries for Aboriginal Respondents

In all divisions, the maximum salary level for Aboriginals employed in full-time training-related positions was lower than reported for all respondents. In four divisions – industrial training, science and health, nursing, and technology - the minimum monthly salary levels are higher for Aboriginals than for all respondents. The average monthly salary is higher in the industrial training division (Graph 10).

Graph 10: Monthly Salary of Full-Time Training-Related Job for Aboriginal Graduates by Division, 2004



4.0 Industry Sectors of Primary Employers

Saskatchewan Labour has identified the industry sectors listed below as important for the province and consequently monthly labour force statistics for the province are reported in this manner. The industry sector question was added to the survey this year in order to determine if SIAST graduates were employed in these particular industry sectors.

In what industry sector does your primary employer operate? (Question 17)

The majority of SIAST graduates (41 percent) reported that they work for employers who operate in the health and social services industry (includes justice/corrections). There is an even distribution of graduates employed in the business and professional services, construction and related trades, educational services, natural resources and transportation, trucking and heavy equipment sectors (7-9 percent).

Table 9 also provides a breakdown of industry sectors by division. Understandably, respondents of the nursing and science and health divisions (by 98 and 85 percent respectively) indicated their employers operated in the health and social services sector.

Business and agriculture respondents reported 35 percent in the business and professional services sector, with the remaining graduates distributed amongst other the sectors.

Community services graduates were primarily employed in the educational services sector (36 percent) and the health and social services sector (26 percent).

Industrial training respondents reported 39 percent employment in the transportation/trucking/heavy equipment sector, with another 23 percent in construction and related trades.

Technology division graduates were clustered in the construction and related trades (25 percent) sector and the natural resources (24 percent) sector.

Table 9: Industry Sector of Primary Employer, by Division, 2004

Industry Sectors by Division N = 1739	SIAST Overall	Business & Agriculture	Community Services	Industrial Training	Nursing	Science & Health	Technology
Advanced Tech, Information Tech, Electronics & Telecommunications	3%	3%	0%	1%	0%	0%	14%

Retail and Wholesale (incl. Automobile dealers)	4%	9%	5%	6%	0%	1%	7%
Transportation/Trucking/Heavy Equipment (incl. Automotive/Autobody Service)	7%	3%	0%	39%	0%	0%	4%
Other	1%	2%	0%	0%	0%	1%	1%

Industry sectors from respondents identified under "other", which could not be categorized into one of the existing twelve identified categories, included:

- Aerospace training
- Arts
- Voluntary sector
- Military
- Religious Ministry
- Community development

5.0 Location of Employment

There is always considerable interest by government officials and the general public if post-secondary graduates remain in the province for employment following graduation.

5.1 Location of Primary Employment for SIAST Respondents

Where is the location of your primary employment? (Question 18)

The majority of employed respondents (92 percent) indicated that they were working in Saskatchewan at the time of the survey. The proportion of graduates working in the two major cities, Regina and Saskatoon (44 percent in total), has remained relatively constant, decreasing one percent from 2002 (Graph 11).

The proportion of graduates who left Saskatchewan to obtain employment increased slightly from 6 percent in 2002 to 8 percent in 2004. The increase came from core program respondents, who had 10 percent of graduates out-migrating in 2004, up from 8 percent in 2002. The overall proportion of extension graduates who out-migrated remained constant at 4 percent.

Graph 11: Location of Primary Employment, by Core/Extension, 2004

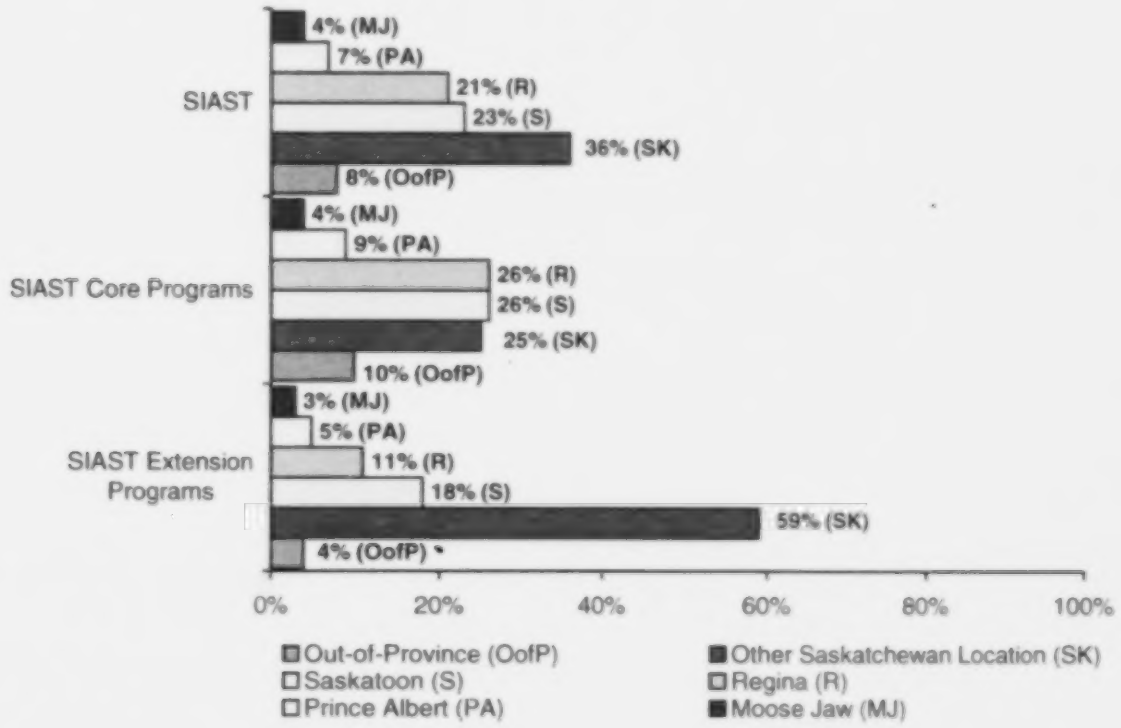

Table 10 provides a breakdown of employment location, by division, by core and extension. The largest out-migration of respondents from core programs continues to be those from the technology division, 16 percent of whom left the province (a two percent decrease from 2002). In extension programming, the industrial training division had the largest proportion of graduates leaving Saskatchewan, at eight percent (Table 10).

Table 10: Location of Primary Employment, by Division, by Core/Extension, 2004

N = 1745	Regina	Saskatoon	Prince Albert	Moose Jaw	Other Sask. Location	Outside Sask.
SIAST Core Programs by Division						
Business and Agriculture	48%	8%	9%	13%	17%	5%

OVERALL SIAST TOTAL	**21%**	**23%**	**7%**	**4%**	**36%**	**8%**

Consistent with past surveys, the majority of graduates remain in Saskatchewan for employment. In 2002, the location percentages were:

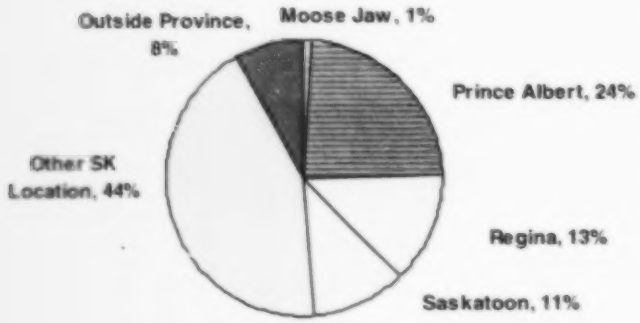
- Regina - 24 percent
- Saskatoon - 21 percent
- Prince Albert - 6 percent
- Moose Jaw - 5 percent
- Other Saskatchewan location - 38 percent
- Outside Saskatchewan - 6 percent

5.2 Location of Primary Employment for Equity Respondents

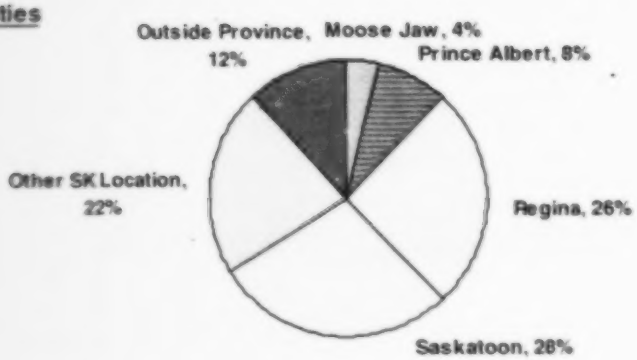
The following graphs highlight where the equity respondents were working at the time of the survey.

Graph 12: Location of Primary Employment for Aboriginal, Persons with Disabilities and Visible Minority Respondents, 2004

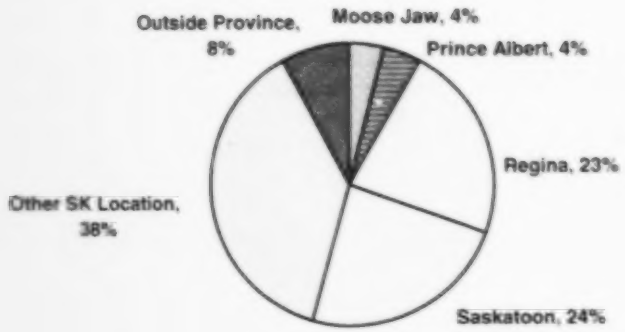
Aboriginal



Persons with Disabilities



Visible Minority



5.3 Out-of-Province Employment for SIAST Respondents

If your primary employment was found outside Saskatchewan, was this by choice? (Q19)

Eight percent of respondents indicated a location of employment outside Saskatchewan, compared to six percent in 2002. Sixty-eight percent (95 of 139) of the respondents who found employment out of Saskatchewan indicated this was by choice. Overall, the science and health (29 of 40 graduates) and the community services (18 of 23 graduates) divisions had the largest number of respondents finding employment outside of Saskatchewan by choice (Table 11).

Table 11: Primary Employment Out-of-Province by Choice, by Division, by Core/Extension, 2004

	#	By choice
SIAST Core Programs by Division

OVERALL SIAST TOTAL	**139**	**68%**

If your primary employment was found outside Saskatchewan, indicate the reason. (Question 20)

Graduates were requested to identify the main reason they sought employment out-of-province. The most common reason provided for obtaining out-of-province employment was personal reasons (44 percent). Just over one-third of all respondents indicated they moved out-of-province to obtain better wages, while one-fifth of all respondents moved in order to find more employment opportunities.

Graduates in the industrial training and technology divisions were more likely to move out-of-province for better wages while all of the nursing graduates moved for personal reasons (Table 12).

Table 12: Reason Primary Employment Out-of-Province, by Division, by Core/Extension, 2004

6.0 Applications and Interviews for Employment

6.1 Applications

How many employment opportunities have you applied for since completing your training program? (Question 8)

The effort that respondents had invested into obtaining employment, after graduation, was indicated by the number of applications that each had submitted and the number of interviews that each attended. These numbers are expressed as both means and medians because medians, as the midway number, are not influenced by extreme responses. The average number of applications for employment that respondents in core programs had submitted ranged from three to twenty-two, depending on the division, with an overall average of twelve. The median number of applications ranged from one to seven, again depending on the division, with an overall average of three. Business and agriculture and technology respondents in the core programs, consistent with the 2002 survey, were at the high end of the range in applications (twenty-two and sixteen respectively), while respondents in nursing as well as science and health were at the low end of the range (three and eight respectively). Similar findings were observed for respondents from extension programs (Table 13).

6.2 Interviews

How many employment interviews have you had? (Question 9)

There was little variation in the number of interviews in which respondents participated. The mean number of interviews for respondents in core programs ranged from one to three, depending on division, while the median number ranged from one to two. Similar findings are noted for respondents in SIAST extension programs (Table 13).

Table 13: Employment Applications and Interviews, Average, Mode, and Median, by Division, by Core/Extension, 2004

	Applications			Interviews		
	Average	Mode	Median	Average	Mode	Median
SIAST Core Programs by Division

7.0 Not Employed

As important as determining the percentage of respondents who obtained employment, was the information to questions about those who were not employed at the time the survey was conducted. Respondents who had indicated in Question 10 that they were not currently employed were asked to complete the questions under the "Not Employed" section of the survey.

7.1 Actively Looking for Work

Are you actively looking for work? (Question 23)

Overall, 54 percent of the respondents (174 of 322), who were not employed at the time of the survey, indicated that they were looking for work. Graph 13 illustrates that graduates who were not employed from extension programs were more likely to be looking for work, than their peers in core programs (61 percent compared to 51 percent in core programs).

Graph 13: Graduates Not Employed but Looking for Work, by Core/Extension, 2004

7.2 Employed Since Graduating from SIAST

Have you worked at all (either - full-time, part-time, or casual) since completing your training program? (Question 25)

If yes, was the most recent work directly related to the education and training you received in your program? (Question 26)

Are you scheduled to return to work in the future? (Question 27)

Of the 322 respondents who were not working at the time they were surveyed, 60 percent (194 of 322) indicated that they had worked at some point since completing their training program. Forty-nine percent of those respondents (92 of 187 who responded to question) indicated that they were scheduled to return to work at some point in the future.

Of the respondents not working at the time of the survey, but who had worked at some point since completing their training, 59 percent (114 of 194) indicated that they had worked in training-related jobs.

7.0 Not Employed

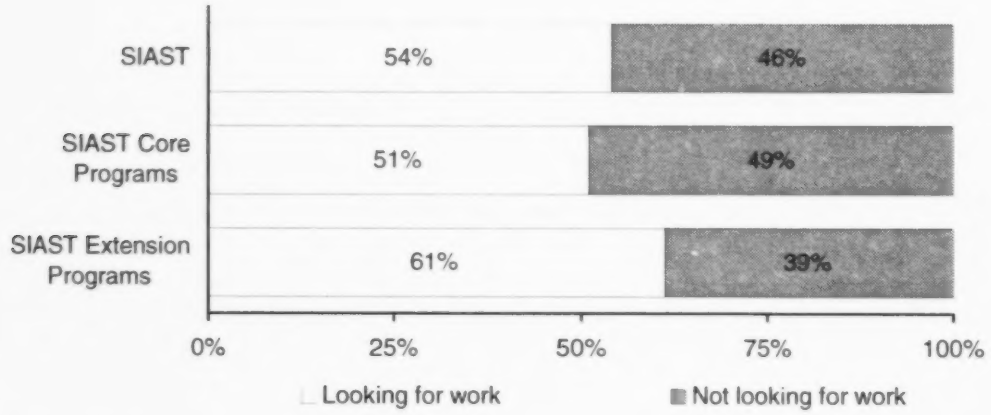
As important as determining the percentage of respondents who obtained employment, was the information to questions about those who were not employed at the time the survey was conducted. Respondents who had indicated in Question 10 that they were not currently employed were asked to complete the questions under the "Not Employed" section of the survey.

7.1 Actively Looking for Work

Are you actively looking for work? (Question 23)

Overall, 54 percent of the respondents (174 of 322), who were not employed at the time of the survey, indicated that they were looking for work. Graph 13 illustrates that graduates who were not employed from extension programs were more likely to be looking for work, than their peers in core programs (61 percent compared to 51 percent in core programs).

Graph 13: Graduates Not Employed but Looking for Work, by Core/Extension, 2004



7.2 Employed Since Graduating from SIAST

Have you worked at all (either - full-time, part-time, or casual) since completing your training program? (Question 25)

If yes, was the most recent work directly related to the education and training you received in your program? (Question 26)

Are you scheduled to return to work in the future? (Question 27)

Of the 322 respondents who were not working at the time they were surveyed, 60 percent (194 of 322) indicated that they had worked at some point since completing their training program. Forty-nine percent of those respondents (92 of 187 who responded to question) indicated that they were scheduled to return to work at some point in the future.

Of the respondents not working at the time of the survey, but who had worked at some point since completing their training, 59 percent (114 of 194) indicated that they had worked in training-related jobs.

Table 14 provides a breakdown, by division and by core and extension programs, of respondent's work experience since graduation.

Table 14: Graduates not Employed - Work Experience Since Graduation, by Division, by Core/Extension, 2004

	Have worked since completion of training	Work directly related to training received	Scheduled to return to work
SIAST Core Programs by Division

* Respondents in extension programs in the nursing division indicated that they were all employed.

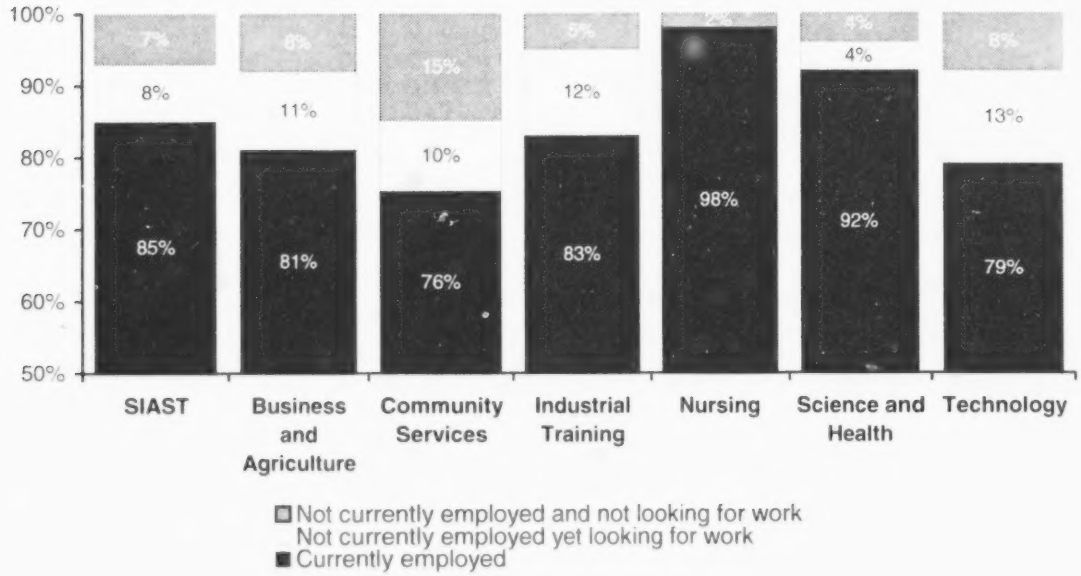
7.3. Not Actively Looking for Work

Are you presently employed? (Question 10)

Based on the 2,071 SIAST graduates who responded if they were working at the time of the survey, seven percent reported they were **not employed and were not looking for work,** primarily because they were enrolled in further education. Approximately 85 percent were employed at the time of the survey and 8 percent were not employed but were actively looking for work.

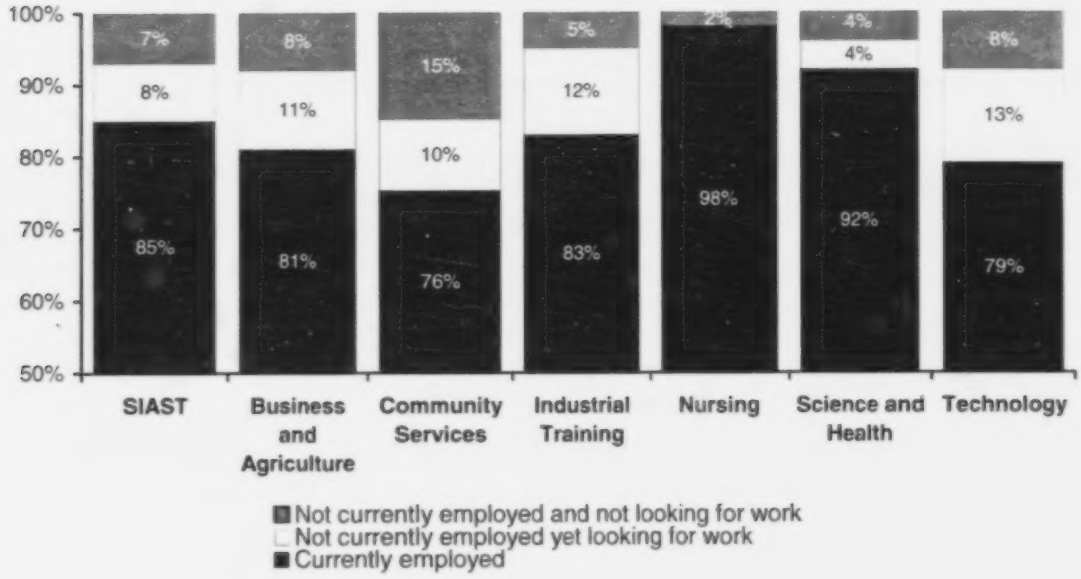
On a divisional basis, the nursing (98 percent) and science and health (92 percent) divisions had the highest proportion of graduates employed, at the time of the survey. The remaining divisions had relatively similar proportions of graduates who were not employed but actively looking for work. The community services division had the highest proportion of graduates who were not actively looking for work (15 percent not employed and not looking for work) (Graph 14).

Graph 14: Graduates Not Actively Looking for Work, by Division, 2004



The employed (1,749) and the unemployed respondents who stated that they were looking for work (174) represent the SIAST-wide respondent **available workforce (1923)** (those respondents who are available to work).

Graph 14: Graduates Not Actively Looking for Work, by Division, 2004



The employed (1,749) and the unemployed respondents who stated that they were looking for work (174) represent the SIAST-wide respondent **available workforce (1923)** (those respondents who are available to work).

7.4 *Reason not Currently Employed*

Which of the following best describes the reason you are currently not employed? (Question 28)

Overall, 52 percent of those who indicated that they were not employed were engaged in activities that prevented them from working. The two most common reasons given by unemployed respondents for not being employed at survey time were *further training* (28 percent) and *presently not available to work* (24 percent). Table 15 provides a breakdown of the reasons graduates were not employed at the time of the survey by division, and by core and extension programs.

Table15: Graduates Not Employed - Reason Not Employed, by Division, by Core/Extension, 2004

	#	Employment seasonal	Further training	No jobs in desired location	Not enough experience	Presently not available to work	No jobs available at all	Other reasons

**Respondents in extension programs in the nursing division indicated that they were all employed.*

The "other reasons" indicated by seven respondents, which could not be fitted into the categories above, included:

- Laid off
- No interest from employers
- No callbacks from interviews
- Waiting for work visa
- Never been called for a job

8.0 Further Education or Training

Though some respondents indicated they had returned to school in section 7.4 as a reason for not looking for work, section 8.0 formally asked all graduates if, at the time of the survey, they were enrolled in further education or training.

8.1 Respondents in Further Education or Training

Are you currently enrolled in an education or training program? (Question 29)

As was the case last year, 18 percent of all SIAST respondents, whether employed or not, were continuing their education at the time of the survey. The largest percentages of respondents enrolled in further education came from core programs in the community services division (31 percent) and extension programs in the technology division (25 percent). Overall, respondents of extension programs were less likely to enroll in further education (14 percent), compared to respondents of core programs (20 percent) (Table 17). A possible reason for this could be less mobility of the respondents in extension to re-locate and take upper-level post-secondary education programs.

Table 17: Graduates Currently Enrolled in Further Education or Training, by Division, by Core/Extension, 2004

	#	Currently enrolled in education/training program

8.2 Type of Further Education or Training

Which type of training is it? (Question 30)

Forty-five percent of respondents who were taking additional education or training at the time of the survey were enrolled in programs at SIAST – either the same SIAST program with a different exit credential or a different program altogether. Another 17 percent of graduates continuing their education were enrolled in apprenticeship training programs. Fourteen percent of respondents overall indicated they were in a university training program, while the remaining one-quarter were enrolled in some other post-secondary education (Graph 15).

Graph 15: Type of Further Training, by Division, 2004

Four respondents indicated the following "other programs":

- Job certification
- Personal interest courses
- Religious training
- Upgrading

9.0 Program Completion

Which of the following best describes your reason for completing this program? (Question 3)

Most respondents (61 percent) indicated the reason for completing training was to obtain *employment in a specific field.* However, *change of career* and *updating job skills* were reasons given at 20 percent and 16 percent respectively in addition to 3 percent that indicated *other reasons.* Results varied slightly by division as well as by both core and extension, as shown in Table 19.

Table 19: Reason for Completing SIAST Program, by Division, by Core/Extension, 2004

	#	Employment in this field	Update job skills	New skills for change of career	Other reasons
SIAST Core Programs by Division					
Business and Agriculture	222	58%	15%	26%	1%

The majority of "other reasons" specified were grouped into the following six areas:

- Family
- Financial
- Good opportunity
- Got laid off from job
- Personal enrichment/interest
- Wanted a hobby

10.0 Program Assessment

All graduates were asked to assess the overall quality of the program(s) they studied at SIAST, and the ability of the training to prepare them for employment.

10.1 Quality of Program

Rate the overall quality of the training you received in your program. (Question 6)

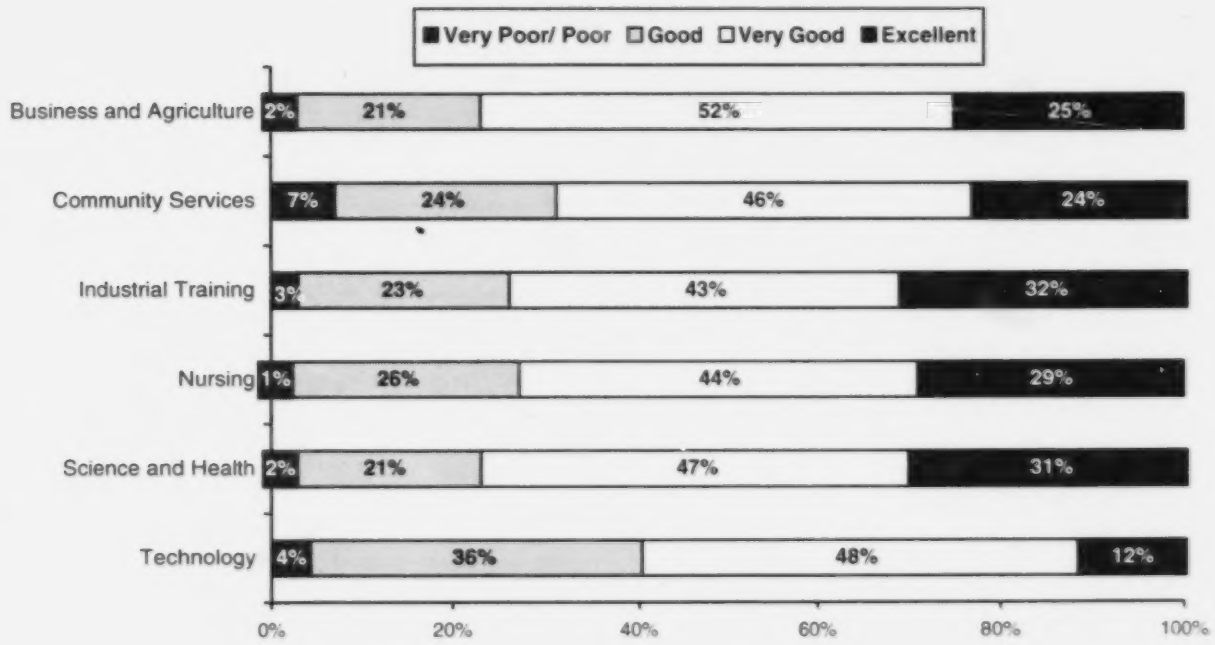
Consistent with the responses in past employment surveys, graduates continue to feel that SIAST provides high quality training. Ninety-seven percent of all SIAST respondents to the survey rated the quality of their training positively (good to excellent) and 71 percent rated the quality of training very good to excellent, as shown in Table 20. Extension programs received a slightly higher rating with 78 percent of graduates indicating training was very good to excellent, compared to 71 percent of graduates in core programs.

Table 20: Overall Quality of Training, by Division, by Core/Extension, 2004

	#	Excellent	Very good	Good	Poor	Very poor
Total SIAST Core Programs	1417	22%	49%	26%	3%	1%
Total SIAST Extension Programs	648	36%	42%	21%	2%	1%
OVERALL SIAST TOTAL	**2065**	**26%**	**47%**	**24%**	**2%**	**1%**

Graph 16 provides a breakdown of training quality by division. The science and health and industrial training divisions received the most favorable ratings from graduates, while the technology division had relatively fewer graduates indicating the programming was very good to excellent.

Graph 16: Overall Quality of Training, by Division, 2004



10.2 Training Preparedness for Employment

Rate how well the training program prepared you for employment in your field of study. (Question 7)

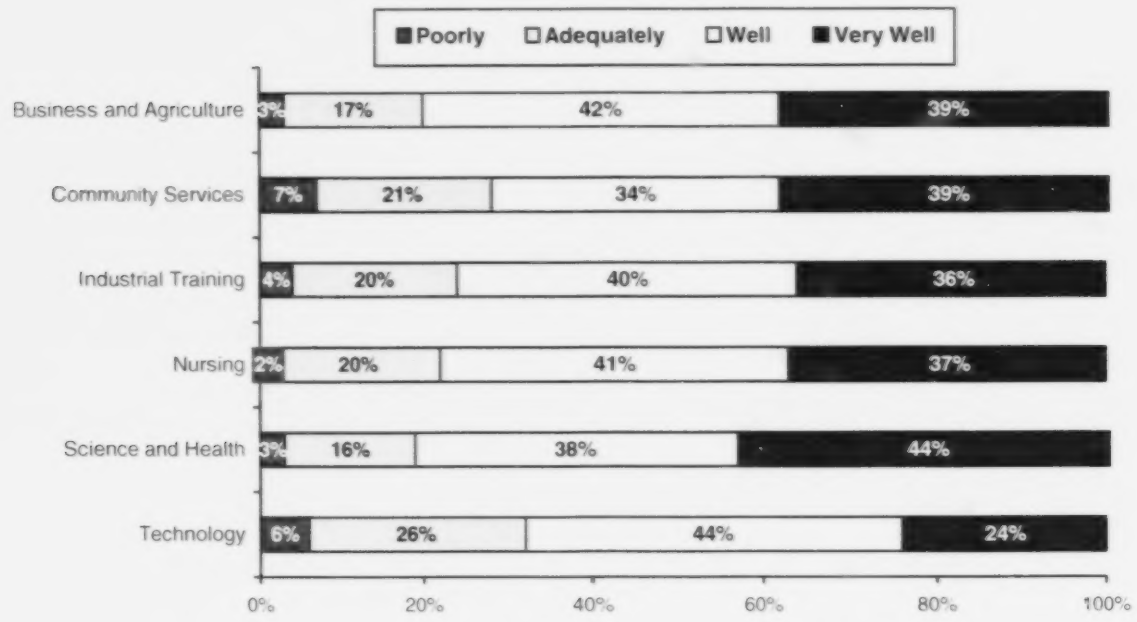
Over three quarters of all respondents (77 percent) found that their training program had prepared them well or very well for a training-related job. Table 21 indicates that a slightly higher proportion of graduates from extension programs feel the training they received prepared them well to very well for employment in their field of study (81 percent compared to 75 percent of graduates from core programs).

Table 21: Training Prepared for Employment in Field of Study, by Core/Extension, 2004

	#	Very well	Well	Adequately	Poorly
Total SIAST Core Programs	1381	34%	41%	21%	4%
Total SIAST Extension Programs	636	45%	36%	16%	3%
OVERALL SIAST TOTAL	2017	38%	39%	19%	4%

Graph 17 provides a breakdown of employment preparation by division. The majority of graduates in all divisions felt that the training they received prepared them well to very well for employment in their field study, from 68 percent of respondents in the technology division to 82 percent of respondents in science and health.

Graph 17: Training Prepared for Employment in Field of Study, by Division, 2004



An internal report was created that included general comments provided by respondents at the end of the survey regarding SIAST's programs and services. The report was distributed to SIAST deans and management for their review and consideration.

10.2 Training Preparedness for Employment

Rate how well the training program prepared you for employment in your field of study. (Question 7)

Over three quarters of all respondents (77 percent) found that their training program had prepared them well or very well for a training-related job. Table 21 indicates that a slightly higher proportion of graduates from extension programs feel the training they received prepared them well to very well for employment in their field of study (81 percent compared to 75 percent of graduates from core programs).

Table 21: Training Prepared for Employment in Field of Study, by Core/Extension, 2004

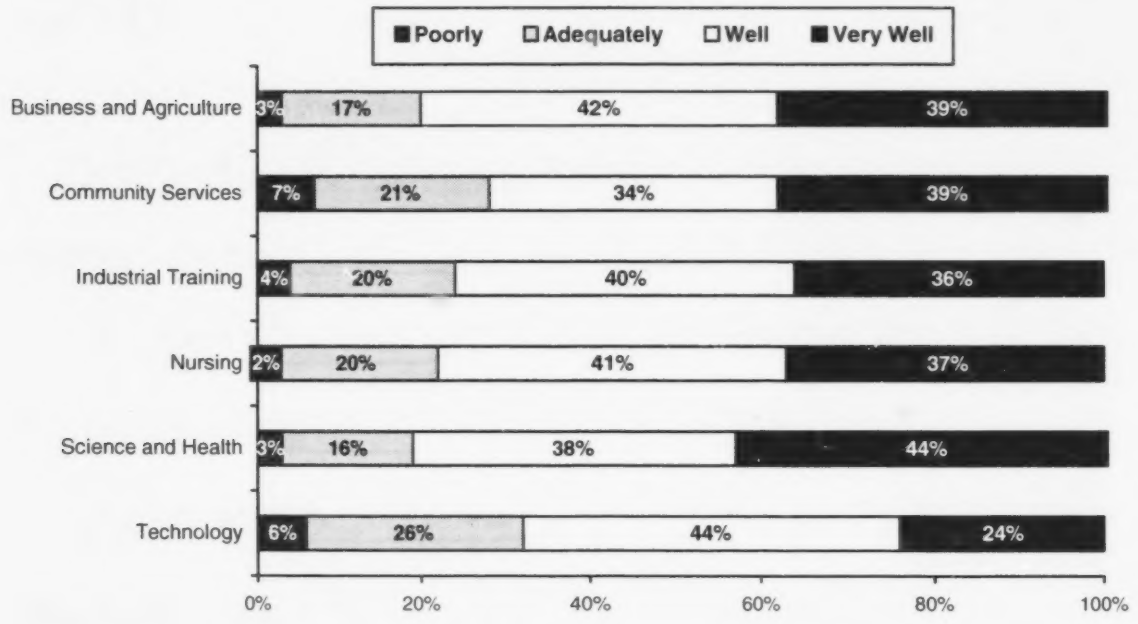
OVERALL SIAST TOTAL	**2017**	**38%**	**39%**	**19%**	**4%**

Graph 17 provides a breakdown of employment preparation by division. The majority of graduates in all divisions felt that the training they received prepared them well to very well for employment in their field study, from 68 percent of respondents in the technology division to 82 percent of respondents in science and health.

Graph 17: Training Prepared for Employment in Field of Study, by Division, 2004



An internal report was created that included general comments provided by respondents at the end of the survey regarding SIAST's programs and services. The report was distributed to SIAST deans and management for their review and consideration.

11.0 Demographics

With an education equity policy, the demographics section of the survey is very interesting for SIAST.

11.1 Gender of all Respondents

Identify your gender. (Question 31)

SIAST-wide, there continues to be more female respondents than male, and the composition changes slightly when both core and extension programs are compared. Among respondents of core programs, the split was 48/52 percent, male/female, while among respondents of extension programs; the ratio was 31/69 percent, male/female. Overall, 57 percent of SIAST respondents were female and 43 percent male (Table 22, Graphs 18 and 19). The division was 40 percent male and 60 percent female in the 2002 study.

Table 22: Gender, by Division, by Core/Extension, 2004

	#	Male	Female
SIAST Core Programs by Division			
Business and Agriculture	223	27%	73%
Community Services	259	26%	74%

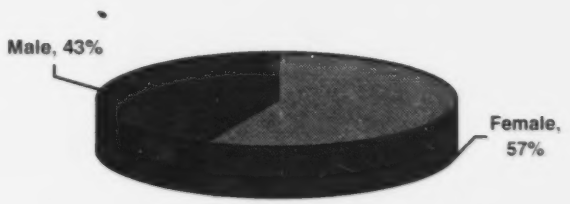
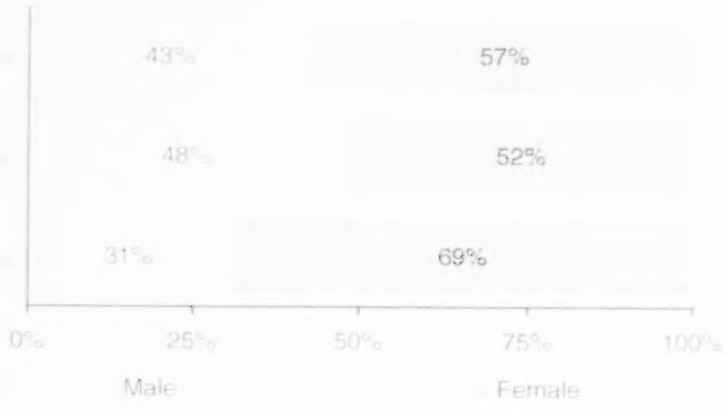
Graph 18: Gender Overall, 2004



Graph 19: Gender by Core/Extension, 2004



11.2 Ages of all Respondents

How old were you on June 30th, 2004? (Question 32)

The average age of SIAST respondents was 29 years, while the median age was 25 years (both similar to the 2002 survey results). Respondents of extension programs were significantly older (with the mean and the median age at 32 and 30 years of age, respectively) than the core program respondents, whose mean and median ages were nearly 28 (at 27.6) and 24, respectively (higher than the 2002 survey results).

Between divisions, there was little diversity in the mean age of respondents in core programs, except for respondents in nursing division programs, whose average age was substantially older at 39 years for core respondents. In SIAST extension programs, respondents in the science and health division had the highest mean age, at 36 years (Table 23, Graph 20).

Table 23: Age at June 30, 2004, by Division, by Core/Extension

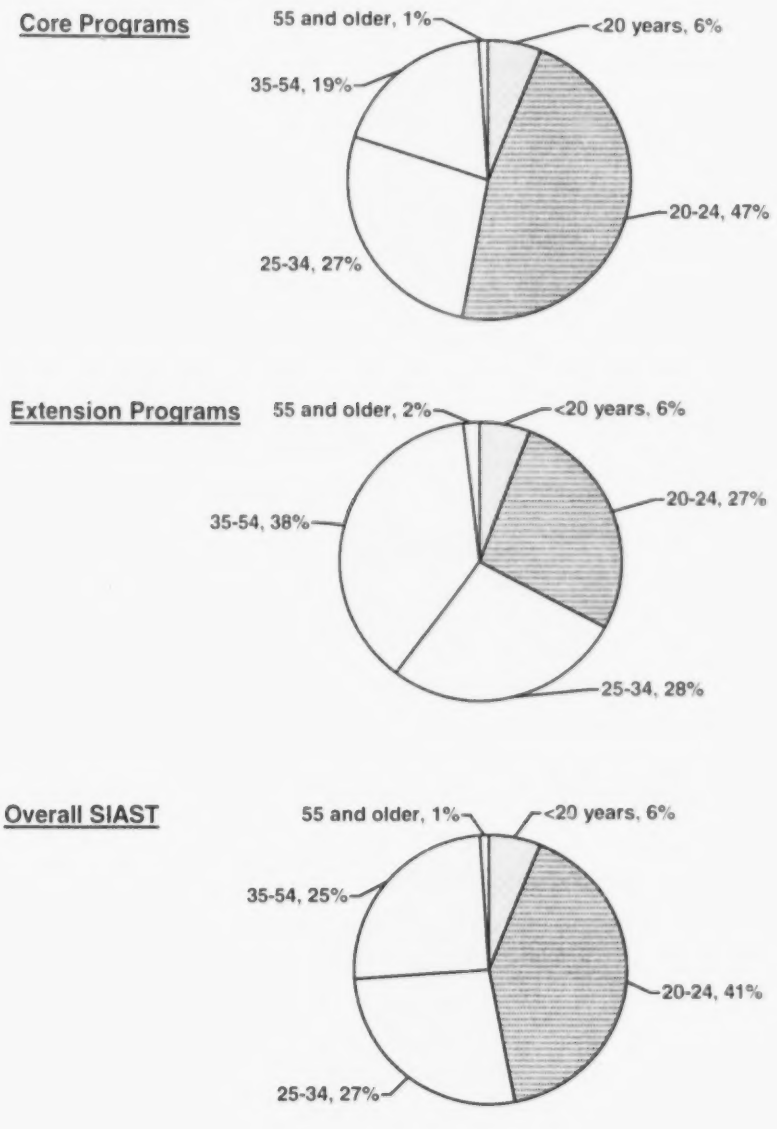
Graph 20: Age at June 30, 2004, by Core/Extension



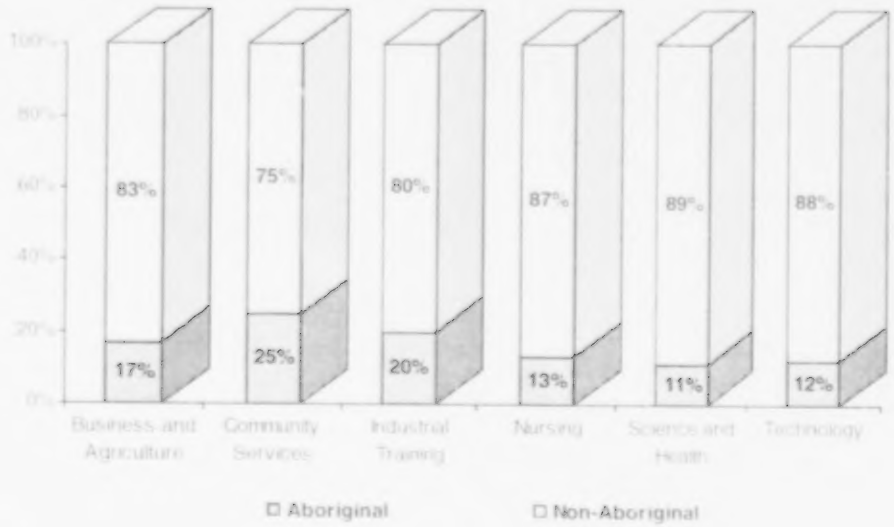
11.3 Aboriginal Ancestry

Are you of Aboriginal ancestry? (Question 33)

The definition of Aboriginal refers to those persons who are First Nations (Registered, Treaty, or Status Indians), Non-status Indians, Métis (those where one parent is of Indian ancestry), and Inuit

Sixteen percent of all SIAST respondents indicated that they were of Aboriginal ancestry, which is an increase of 3 percent from the last survey. The Aboriginal participation has constantly been increasing in the last four graduate employment surveys. Of the core program respondents, 12 percent were of Aboriginal ancestry, an increase of two percent over last year. Twenty-four percent of respondents from the extension programs had reported that they were of Aboriginal ancestry, which represents an increase of 6 percent from the previous survey (Graph 21).

Graph 21: Aboriginal Ancestry Identification, by Division, 2004



Aboriginal Category

Do you consider yourself Status/Treaty Indian, Metis, Non-Status Indian or Inuit? (Question 34)

The majority of Aboriginal respondents indicated that they were Metis (59 percent) or Status/Treaty Indian (36 percent), while the Non-Status group made up 6 percent. There was one Inuit respondent who had self-declared (in previous surveys, the Inuit population was less than 1 percent of the overall student population) (Table 24).

11.4 Visible Minority Declaration

Do you consider yourself a member of a visible minority? (Question 35)

Graduates were given the option to identify themselves as members of a visible minority. The definition of visible minority includes those who are visibly distinguishable from the majority of Canadians on the basis of race or ethnic origin. It does not include those declaring Aboriginal ancestry. Visible minority graduate numbers increased slightly from the previous survey, to 7 percent (Table 25).

Table 25: Visible Minority Identification, by Division, by Core/Extension, 2004

11.5 Persons with Disabilities Declaration

Do you consider yourself a person with a disability? (Question 36)

Graduates were given the option to indicate if they were persons with disabilities. The definition of a person with a disability includes any person with an ongoing physical, mental, psychiatric, learning or sensory disability that is caused by bodily injury, birth defect or illness.

Six percent of respondents indicated that they had a disability, slightly higher than the 4 percent reported in 2002. Five percent of extension program respondents reported a disability, which is a 4 percent increase from 2002. Within the core programs, the highest percentages of disabled respondents were in community services (11 percent) and industrial training (9 percent). For extension programs, the highest percentage of disabled respondents fell in the industrial training division at 10 percent (Table 26).

Appendices

Appendix A: Program Changes

Revisions to the following programs were recently approved. Some revisions were effective immediately and other revisions not effective until the 2004-05 academic year.

Division/Program Name	Change
Business and Agriculture	
Administrative Office Assistant	Program deleted – graduate completing program
Beef Management	Program retitled Beef Cattle Production 2004-05 – graduates completing Beef Management
Beekeeping	Program deleted – no graduates
Computer Clerk	Program deleted – graduates completing program
Computerized Office Assistant	Program deleted – graduates completing program
Dispute Resolution	Program to be deleted 2005-06 – graduates completing program
Medical Office Assistant (Certificate)	Program deleted – graduates completing program
Social Housing Supervision	Program retitled Social Housing Management 2004-05 – graduates completing Social Housing Supervision
Teleservice Customer Representative	Program retitled Contact Centre Professional 2004-05 – graduates completing Teleservice Customer Representative
Community Services	
Food Service Worker	Credential revised to applied certificate 2004-05 – graduate completing certificate
Teacher Assistant	Program retitled Educational Assistant 2004-05 – graduates completing Teacher Assistant
Industrial Training	
Heavy Equipment Operator	One credential with specialties 2004-05 – graduates completing separate specialty credentials in 2003-04
Vocational Forestry Delimber	Program deleted – graduates completing program
Vocational Forestry Feller Buncher	Program deleted – graduates completing program
Vocational Forestry Grapple Skidder	Program deleted – graduates completing program
Nursing	
Gerontological Nursing RN/RPN	Program suspended 2004-05 – no graduates in 2003-04
Science and Health	
Emergency Medical Technician Advanced	Program retitled Intermediate Care Paramedic – graduates completing EMT-A
Emergency Medical Technician Paramedic	Program retitled Advanced Care Paramedic – graduates completing EMT-P
Emergency Services Communicator	Program deleted 2004-05 – no graduates
Health Information Services (Certificate and Diploma)	Program retitled Health Information Management 2004-05, certificate credential level deleted 2004-05. Graduates completing certificate level.
Technology	
Applied Electronics Technician	Program retitled Electronics Technician 2004-05 – graduates completing Applied Electronics Technician
Architectural Technology	Program deleted – graduate completing program
Building System Operator	Program deleted – graduate completing program
Electronic Communications Technician	Program deleted – graduates completing program
Electronic Service Technician	Program deleted – graduates completing program
Industrial Electronics Technician	Program deleted – graduate completing program
IRM Fisheries Technician	Program deleted – graduate completing program
IRM Parks Management Technician	Program deleted – graduate completing program
Micro-Electronics Technician	Program deleted – graduates completing program

Appendix B: 2004 Graduate Employment Survey

SIAST
SASKATCHEWAN INSTITUTE OF
APPLIED SCIENCE AND TECHNOLOGY

2004 Graduate Employment Survey

November 2004

Dear Graduate:

Every second year, graduates from SIAST programs are asked to complete graduate employment questionnaires. Data from the completed questionnaires is used in several reports that provide information to the education, government and private sectors in the province. The data gathered is also used as supporting information in the planning and development of SIAST programs and tells us how well we have prepared our graduates for work.

As a recent graduate of a SIAST program, please take a few minutes to complete the 2004 graduate employment questionnaire and return it in the enclosed, postage paid envelope. If you have recently graduated from more than one SIAST program, you will receive a separate questionnaire for each program. Please complete a questionnaire for each program. Participation in this survey is voluntary. Your responses will be recorded in aggregate form (overall totals with all other responses) and therefore will be kept anonymous and confidential.

Your co-operation and assistance is greatly appreciated. Please respond by December 31, 2004. Thank you.

Sincerely,

G. Sarkar

Gerlinde Sarkar
Academic Director of Planning, Research and Development

General Information

Q1 What is the name of the program from which you graduated?
_____

Q2 Where did you take the program? Indicate the SIAST campus or regional college:_____

Q3 Which of the following best describes your reason for completing this program? **(SELECT ONLY ONE)**
_____ Wanted to be employed in this field
_____ Needed to update my job skills
_____ Needed new skills for a change of career
_____ Other reasons (please specify) _____

Q4 When did you start this particular program? _____ Month _____ Year

Q5 If the time to complete was longer than the normal length of the program (i.e. more than one year for a certificate program), please indicate the primary reason why:
_____ Academic workload
_____ Employed while studying
_____ Family responsibilities while studying
_____ Financial
_____ Access to programming and services
_____ Other (please specify) _____

Q6 Using the following scale, please rate the overall quality of the training you received in your program:
_____ Excellent _____ Very good _____ Good _____ Poor _____ Very poor

Q7 How well did the training program prepare you for employment in your field of study?
_____ Very well _____ Well _____ Adequately _____ Poorly

Q8 How many employment opportunities have you applied for since completing your training program? _____

Q9 How many employment interviews have you had? _____

Q10 Are you presently employed?
_____ Yes **(CONTINUE ON TO Q11)** _____ No **(GO TO Q23)**

Employment Information – If you are presently employed, complete Q11-22. If not, go to Q23

Q11 How many jobs do your currently have? _____

Q12 Are you self-employed? _____Yes _____No

Q13 What is the title of your primary (main) job?
_____

Q14 What is your employment status of your primary job? **(SELECT ONLY ONE)**:
_____ Full-time (more than 30 hours per week)
_____ Part-time (less than 30 hours per week)
_____ Casual

Q15 If your primary job is a part-time or casual position, is this by choice?
_____ Yes _____ No

Q16 What is your hourly salary of your primary job, before deductions?
$_____ /hour If hourly rate is unknown, provide an average monthly salary $_____/month

Q17 In what industry sector does your primary employer operate? (**SELECT ONLY ONE**):
_____ Advanced Technology, Information Technology, Electronics and Telecommunications
_____ Business and Professional Services
_____ Construction
_____ Educational Services
_____ Film, Video, Multi-media, Printing and Publishing
_____ Health and Social Services
_____ Hospitality and Tourism
_____ Manufacturing (includes Agri-value and Food Processing, Biotechnology, Pharmaceuticals and Nutraceuticals)

_____

_____

_____

In conjunction with this graduate survey, SIAST will also be contacting employers in the spring regarding an evaluation of training that the graduates received in their programs. The Employer Survey will be general in nature and emphasis will be based on the training and skills graduates had been taught and not on the performance of the personnel that they have employed.

Please provide the company name, and the name, title, phone number, and address (including postal code) of the manager/supervisor/human resources person who would be able to answer a set of evaluation questions.

Name of contact person: _____Phone #: _____
Title:_____

Company name:_____

Full address of head office (including postal code) - if applicable _____

Full address of your location of work (including postal code):_____

Thank you for completing this questionnaire.
Please return it as soon as possible in the envelope provided.

Appendix C: 2004 SIAST Graduate Employment Survey - responses per question

The total number of graduates responding to each question varied because:
a) respondents did not always provide answers to all questions, and/or b) some questions were not relevant to all respondents.

Number of Graduates Surveyed:	**4194**
Number of Respondents:	**2071**

Q1. What is the name of the program from which you graduated?

	# of Respondents to question
Q2. Where did you take the program? Indicate the SIAST campus or regional college:	
Kelsey	553
Palliser	291
Wascana	451
Woodland	276
Regional college	314
Other location	182
	2067
Q3. Which of the following best describes your reason for completing this program? (Select only one)	
Wanted to be employed in this field	1229
Needed to update my job skills	290
Needed new skills for a change of career	398
Other reasons	150
	2067

Q5. If time to complete was longer than the normal length of the program (i.e. more than one year for a certificate program), please indicate the primary reason why:	
Academic workload	59
Employed while studying	103
Family responsibilities while studying	39
Financial	13
Access to programming and services	12
Other	219
	445
Q6. Using the following scale, please rate the overall quality of the training you received in your program:	
Excellent	536
Very Good	964
Good	503
Poor	48
Very Poor	14
	2065
Q7. How well the training program prepare you for employment in your field of study?	
Very well	759
Well	791
Adequately	385
Poorly	82
	2017

Q8. How many employment opportunities have you applied for since completing your training program?

Maximum number	300
Mean number	8
Median number	2

Q9. How many employment interviews have you had?

Maximum number	96
Mean number	2
Median number	1

Q10. Are you presently employed?

Yes	1749
No	322
	2071

RESPONSES TO QUESTIONS FOR THOSE THAT INDICATED THEY WERE PRESENTLY EMPLOYED

Q11. How many jobs do you currently have?

Maximum	5
Mean	1
Median	1

Q12. Are you self employed?

Yes	119
No	1625
	1744

Q13. What is the title of your primary (main) job?

Q14. What is your employment status of your primary job? (Select only one)

Full-time (more than 30 hours per week)	1239
Part-time (less than 30 hours per week)/Casual	504
	1743

Q15. If your primary job is a part-time or casual position, is this by choice?

Yes	211
No	290
	501

Q16. What is your hourly salary of your primary job, before deductions? If hourly rate is unknown, provide an average monthly salary:
(Hourly salaries converted to monthly amount and analysed for **Full-Time Training-Related Employment** only)

Maximum	$9750
Mean	$2491
Median	$2250
Minimum	$998

Q17. In what industry sector does your primary employer operate? (Select only one):

Advanced Technology, Informational Technology, Electronics and Telecommunications	47
Business and Professional Services	154
Construction	135
Educational Services	135
Film, Video, Multi-Media, Printing and Publishing	15
Health and Social Services	722
Hospitality and Tourism	80
Manufacturing (incl. Agri-value and Food Processing, Biotechnology, Pharmaceuticals & Nutraceuticals)	86

Natural Resources (Agriculture, Forestry, Environment, Mining, Oil and Gas)	132
Public Administration	19
Retail and Wholesale (includes Automobile dealers)	79
Transportation/Trucking/Heavy Equipment (includes Automotive/Autobody Service)	123
Other	12
	1739

Q18. Where is the location of your primary employment?

Regina	370
Saskatoon	409
Prince Albert	130
Moose Jaw	65
Other Saskatchewan location	628
Outside Saskatchewan	143
	1745

Q19. If primary employment was found outside Saskatchewan, was this by choice?

Yes	95
No	44
	139

Q20. Please indicate why you moved out-of-province for employment: (Select only one)

Desired employment level only available out-of-province	26
Better wages, benefits or opportunities for advancement	40
Personal reasons	41
Other	33
	140

Q21. Are you employed in a job directly related to the education ad training you received in your program at SIAST?

Yes	1372
No	371
	1743

Q22. If yes, is this training related job your primary job?

Yes	1340
No	32
	1372

RESPONSES TO QUESTIONS FOR THOSE THAT INDICATED THEY WERE NOT PRESENTLY EMPLOYED

Q23. Are you actively looking for work?

Yes	174
No	148
	322

Q24. Which of the following best describes your reason for not looking for work? (Select only one)
[These results include only those who were not employed at the time of the survey]

Returned to school to take more education	88
Health/Disability problems	10
Family responsibilities	19
Given up looking	6
Other reason	25
	148

Q25. Have you worked at all (either full-time, part-time or casual) since completing your training program?

Yes	194
No	128
	322

Q25. If yes, was the most recent work directly related to the education and training you received in your program?

Yes	114
No	80
	194

Q27. Are you scheduled to return to work in the future?

Yes	92
No	95
	187

Q28. Which of the following best describes the reason you are currently unemployed? (Select only one)

Employment is seasonal	32
Require further training	26
No jobs in desired location	41
Not enough experience	31
Not available to work at present	24
No jobs available at all	27
Other reason	136
	317

RESPONSES TO QUESTIONS ON FURTHER EDUCATION FROM ALL RESPONDENTS

Q29. Are you currently enrolled in any education or training program?

Yes	366
No	1699
	2065

Q30. Which type of training is it?

The same SIAST program (different credential)	117
A different SIAST program	43
A post-secondary program at another institute	25
An apprenticeship program	60
A university program	52
Some other program	68
	365

RESPONSES TO DEMOGRAPHIC QUESTIONS FROM ALL RESPONDENTS

Q31. Identify your gender

Male	882
Female	1189
	2071

Q32. How old were you on June 30th, 2004?

Maximum age	65
Mean age	29
Median age	25
Minimum age	17

Q33. Are you of Aboriginal ancestry?

Yes	332
No	1721
	2053

Q34. Do you consider yourself?

Status/Treaty Indian	118
Metis	193
Non-Status Indian	18
Inuit	1
	330

Q35. Do you consider yourself a member of a visible minority?

Yes	143
No	1890
	2033

Q36. Do you consider yourself disabled?

Yes	131
No	1927
	2058
